Discover Swedenborg's *Divine Love and Wisdom* —

in a beautiful new deluxe edition from the Swedenborg Foundation, opening with a scholarly introduction by Bryn Athyn College of the New Church's own Dr. Marcy Latta, Chief Academic Officer.

In "Swedenborg's Philosophical Theology," Dr. Latta guides readers through the work's central themes. She places its arguments in conversation with the great minds of Western thought, from Plato and Aristotle to Descartes, Spinoza, Leibniz, and Kant. The volume pairs George F. Dole's translation with extensive annotations and indexes from a team of Swedenborg scholars. This clothbound, gold-stamped edition is as welcoming to the newcomer as it is rewarding to the specialist.

"In Swedenborg's metaphysics, divine love and divine wisdom are...introduced as the constituents of fundamental reality: love and wisdom are the essence of everything — of God, of the universe, and of humanity"
